

# Jakub Patkowski

I am currently a student at Lublin University of Technology, studying Computer Science (2nd semester, part-time Master's degree). I have one and a half years of commercial experience as a .NET backend developer at a company developing an AI-integrated framework for managing organizations and teams. I have experience in modular monolith and microservices architecture. In my free time, I develop my own projects and tutor mathematics and programming.

## TECHNOLOGIES & LANGUAGES

### Backend

C# ( .NET, Web API, Entity Framework Core) - 1.5 years commercially  
Java (Spring Boot, Spring Security) - engineering thesis project,  
PostgreSQL, MySQL, Keycloak, Apache Pulsar, RabbitMQ, Grafana

### Frontend:

Angular, React, TypeScript, JavaScript, HTML/CSS, Bootstrap

### Tools:

Git (GitLab, GitHub), GitLab CI/CD, Docker, Linux

### Additional:

C++, Python, Cybersecurity, Microservices, Domain Driven Design

## EDUCATION

### Lublin University of Technology

Part-time Master's degree  
Computer Science

- Specialisation: Software Engineering and Web Services  
2025 – present (2nd semester)

### Lublin University of Technology

- Bachelor's degree  
Computer Science  
Specialisation: Software Engineering  
2020 – 2025.

### Liceum ogólnokształcące im. ks. Stanisława Staszica w Hrubieszowie

- Mathematics, Physics & IT profile,  
2017 – 2020

## LANGUAGES

Polish - native

English - C1

## EXPERIENCE

- **Unmanned Systems Poland 12.2024 – present**  
**.Net Backend Developer**

Designing and implementing modules in a modular monolith architecture.

Independent implementation of entire microservices (forum plugin).  
Integration with external systems (Keycloak, Apache Pulsar, RabbitMQ, Matrix, MCP Tools for AI)

Creating technical documentation and implementing unit/integration tests

Conducting code reviews and mentoring new team members

Presenting technical reports at meetings with foreign investors.

- **Coding Giants 07.2024 – present**

Leading long-term courses in cybersecurity, C++ and C# for groups of 8–12 students

Conducting demo lessons (C#, Python) for prospective students.

Preparing materials, monitoring student progress, adjusting the pace of teaching to the group, communicating with parents

Using CRM systems and Google Meet.

- **Private Tutor 2019 – present**

Individual tutoring in mathematics, physics and programming

Preparing teaching materials and lesson plans

Adapting teaching methods to individual student needs.

- **Additional jobs (summer / during studies)**

cashier-seller ( 9 months)

Construction worker (3 months)

Parcel sorting worker (3 months)

Fruit and vegetable harvesting (6 months)

# ADDITIONAL

## ADDITIONAL SKILLS

- Knowledge of project management processes including Agile
- Basic knowledge of cybersecurity (CISCO certificate, conducting cybersecurity classes)
- Effective time management
- Ability to work in a team
- Quick to learn new programming languages and technologies
- Proficient in reading and using technical documentation
- Strong soft skills: leading multi-person groups, conducting demo lessons, communicating with foreign investors
- Knowledge of good programming practices
- Attention to detail, conscientiousness and strong work ethic

## PROJECTS

- **Engineering Thesis – Java Spring Boot**  
<https://github.com/JakubPatkowski/KorepetycjeOnlineBackend>  
Educational platform with courses and assignments. REST API based on Spring Boot, working with an extensive PostgreSQL database. SMTP server integration. JWT authentication.
- **To-Do List – C# .NET**  
<https://github.com/JakubPatkowski/ToDoTaskApi>  
REST API for managing a to-do list, built with the .NET framework. Containerised with Docker. Includes comprehensive unit and integration tests.
- **Apartment Price Comparison – Angular & Laravel**  
<https://github.com/JakubPatkowski/ProjektAngularLaravel>  
Comparison of apartment prices against interest rates. Both frontend and backend implemented. Data sourced from official National Bank of Poland reports.
- **Warsaw Real Estate Clustering – Python**  
<https://github.com/JakubPatkowski/WarsawRealEstateClustering>  
Application for analysing apartment price data sourced from the NBP API and reports. Data analysis using clustering algorithms. Merging GeoJSON object boundaries, generating synthetic data.

## CERTIFICATES

- Reactive Architecture: Reactive Microservices, Cognitive Class
